Quick Evacuation

BABY® MOVER

BABY MOVER®

Perfect for child daycare centres and home daycare

The professional evacuation apron

Up to 5 children
at the same time, a quick
and safe evacuation!

During an emergency you can evacuate several babies and toddlers in safety at the same time by using the BABY MOVER®

The BABY MOVER® is made of fire retardant material which has been extensively laboratory tested.

Should an evacuation become necessary the BABY MOVER® can be quickly pulled over the head of the adult like a T Shirt with its large neck and armhole openings, enabling it to move up to 3 children at the same time.

The babies should be placed in an upright position, facing the carrier, with the baby's legs placed through the appropriate openings in the pocket. The person wearing the BABY MOVER® then has hands free to take other children from the danger zone.

The BABY MOVER® is designed and patented by Wi-Care B.V.
Detailed test reports are available on request.

Tested, flame retardant materials
Reflective safety stripes
First class workmanship

BABY® MOVER

Up to max. **27kg/60lb** weight (**9kg/20lb** per pocket)
